

Metal Cleaner

WIKO Metal cleaner is a highly concentrated cleaner to intensively clean the most diverse metals.

Trading units	Item no. :
500ml aerosol can	AMTR.D500
1000ml can	AMTR.D1000

Application Areas

- Perfect cleaner for repair, maintenance and assembly
- Removes oil, grease, resin, adhesive residues, coupling and brake abrasion
- Cleaning of engine parts, springs, electric equipment, starters, anti-friction bearings and guides
- Removal of stains on metal surfaces

Characteristics

- Strong, fast and thorough cleaning
- Removes even the heaviest staining
- Without residues in comparison to the application of thinner

Instructions

Shake the aerosol can intensively for approx. 2 minutes before the application and perform a spray test. Afterwards, apply the spray crosswise from a distance of 20 to 30 cm.

Aerosol can: Apply the product directly from the aerosol can onto the parts to be cleaned and wipe off the liquid with a cloth.

Container: Apply the product with a cloth onto the parts to be cleaned and wipe off the parts with a cloth.

In case of heavy staining, repeat the procedure several times if necessary.

Please test the compatibility of sensitive materials on spots that are not visible.

The information contained in this data sheet, especially the suggestions for processing and application of products, is based on our experience and newest expertise. Due to the facts that materials can be very diverse and that we have no influence on the working conditions, we recommend to perform sufficient tests to validate the compatibility of the products. Our company shall neither be held liable for this information nor for a verbal or written consultation. Additionally, please consider the information of our safety data sheets.
